

John Deere oil filters + Plus-50™ II engine oil = 500 hours* free of downtime

When you pair John Deere oil filters with premium Plus-50 II engine oil, there's no stopping you for 500 hours!* Because John Deere engineers design our maintenance products to work hand in hand to defend your machine from harsh conditions and wear. Plus, both John Deere filters and Plus-50 II are ready to protect Final Tier 4 engines.

Don't take your equipment to the field without this winning combination. Trust John Deere oil and filters to help your machines last and save you money. Visit JohnDeere.com/OilChangeCalculator to compare John Deere oil and filter annual costs with the competitor's offerings.

*500-hour drain interval applies to diesel John Deere engines when the following criteria are met: 1. Engine is equipped with an extended drain interval oil pan, 2. Machine operates with Plus-50 II engine oil API CJ-4/SN, 3. Machine uses a John Deere oil filter, 4. Machine uses only Ultra Low Sulfur Diesel fuel.

Oil Filters

Dirty oil will slow you down, leading to less productivity and shorter service intervals. That's why John Deere filters are tested to make sure they capture more dust than lesser quality filters.

Benefits of John Deere oil filters:

- Even pleats and media spacing ensure even filtration for better overall protection without gaps
- Spiral and crimped center tube adds strength to prevent media from collapsing and letting unwanted particles into your system
- Rubber gaskets encourage a tighter seal than plastic gaskets found in competitive filters
- Specifically designed to meet the needs of John Deere engines

Fuel Filters

When it comes to your fuel, water is the number one enemy. That's why John Deere fuel filters are not only designed to trap water, they're designed to repel it. Our filters have coated media that keep water out, preventing rust and microbial growth that could damage your fuel and lead to poor fuel economy.

Benefits of John Deere fuel filters:

- Tight pleats and even media spacing—ensures high capacity to catch water and dust particles before they damage your fuel
- Coated media—repels water and prevents it from soaking through to fuel like uncoated media can
- Tight seal between media and filter casing—ensures unfiltered, dirty fuel won't reach engine

Air Filters

John Deere air filters are another high-quality line of defense against contaminants invading your engine. They reduce engine wear by removing dust, dirt, and other pollutants from intake air. They are highly efficient when it comes to trapping unwanted particles.

Benefits of John Deere air filters:

- Even pleats and more media ensure high efficiency and a longer service interval
- Proper airflow ensures a minimum flow restriction while capturing more contaminants than leading competitive air filters
- A tight seal keeps contaminants from bypassing the filter

Hydraulic Filters

Our hydraulic filters are designed specifically to protect John Deere hydraulic systems from component wear and hydraulic surge flow. They keep contaminants out and prevent sludge and acid from damaging your machine.

Benefits of John Deere hydraulic filters:

- Even pleats—provides a higher capacity for contaminants and a longer service interval
- Extra media support—additional hot glue melts strengthen media and ensure even spacing for 99 percent efficiency

John Deere Filters

John Deere filters are expertly engineered to catch small particles like dirt and other contaminants before they pollute your engine. We offer filters to fit all John Deere applications; the list below only represents a few. Talk with your authorized John Deere dealer to learn more about the full line of John Deere filters.

NUMBER**	DESCRIPTION	ENGINE MODEL*
John Deere Oil Filters
